, After the news that Google will be released in the 11 code-named Gingerbread ( gingerbread ) system of Android 2.3 SDK. The latest news shows , the rumor is probably true, but , after the release of the Android 2.3 , Google Nexus One benchmark models will soon be the new system upgrade . sources, Google is planning in the coming days will be the developer version of the Nexus One upgrade to the Android 2.3 system (Gingerbread). be the first Android 2.3 phone system, but their press conference yesterday, only Samsung has introduced a system using Android 2.1 Continuum. From the current situation, it really will launch Google Nexus Two is still uncertain. , LG mobile phone has always been to attract a large number of US -based customers , some time ago launched the LG mini GD880 is a touch phone , the whole body is not a button , this phone appears to be very handsome . Machine Shanghai offer 2,120 yuan friends who are interested may wish to look . , shape design , LG Mini GD880 has a small slender shape , only 102x47.6x10.6mm measurements , good indication of its mini title . Heritage of the LG touch screen candy bar phone Three sides brushed metal design GD880, use a plastic cover in the post , and joined the rubber coating, feel full , but in cleaning up more difficult . , performance ,

GD880 built a 5-megapixel camera with auto-focus function, but do not have the LED flash and self-assisted. Machine with a 3.2-inch screen, 480 × 524 pixels to the screen colors more vivid. LG in the UI design is very beautiful, the system response speed is quite sensitive, allowing users to use the process very convenient. LG named this the mini GD880, the biggest feature is the shape of small, very likable, a good inheritance LG's fashion design. And the surface is not a key GD880, is a very strong touch phone, and build small, is also very suitable for girls to use. Contact the business like a friend right now.

we previously reported, by the custom operator AT & T Samsung Galaxy S II is not in the Samsung dual-core processor, but equipped with a 1.5GHz high-frequency high-pass dual-core processors. Now, from AT & T's official news that this configuration is more powerful Galaxy S II will begin on 2 October this year, sales.

U.S. carrier AT & T has announced that its custom Galaxy S II will be officially launched on October 2, two-year contract price of \$ 199.99, or about 1278 yuan, but compared to T-Mobile and Sprint version of the Galaxy S II, this custom did not enhance the machine's screen size is still 4.3 inches.

according to the data prior to exposure, AT & T version of the Galaxy S II will use the WVGA (480 × 800 pixels) Li magic level Super AMOLED Plus screen, powered by Qualcomm's dual-core 1.5GHz processor, running the latest Android 2.3.4 system, and 800-megapixel camera, support for 1080p HD video recording, the overall configuration is still strong.

In the last annual Mobile World Congress 2011, HTC officially announced the company's five Android smart phone, which HTC Droid Incredible S is located in a high-end market flagship product. And although the company did not disclose the specific HTC launch date, but said recent foreign media exposure, this new smartphone will be formally listed.

according to the news that this exposure, a model for the HTC new product is now officially in the computer system operator Verizon, and the product is called So you can guess, this new product is likely that the HTC Droid Incredible follow-up models - HTC Droid Incredible S customized version. At the same time, this phone is logged into the computer system operator Verizon speculated, HTC Droid Incredible S is near the formal market.

HTC Droid Incredible S equipped with the Android 2.2 version of the system and HTC Sense UI, with a 4-inch WVGA resolution capacitive touch screen. In the hardware configuration, the phone uses a 1GHz clock speed of the processor Qualcomm Snapdragon MSM 8255 chipset, and have 768MB of RAM. HTC Incredible S is equipped with a support 720p HD video capture 8-megapixel rear camera and a video call front camera 1.3 million pixels. In addition, the phone battery capacity of 1450 mA.

Apple iPhone 4S, listing, attentive friend may have found, iPhone 4S in the U.S. carriers into three. Verizon, Sprint, AT & T have entered into a collaboration with Apple, the latest generation in the United States sales of the iPhone product. A previous AT & T exclusive sales compared to carriers seem to have more competition. The recent data from a survey point of view, this policy seems to AT & T's iPhone users have had an impact.

icon above we can see, iPhone 4 current U.S. by AT & T and Verizon carriers, AT & T accounted for 60% share. Listing in the iPhone 4S, AT & T share fell to a 56%, Verizon, Sprint, respectively, accounted for 32% and 12%. Three operations for AT & T seems to influence is still obvious.

But Still, AT & T still has the largest percentage of iPhone users. This is the old iPhone users have a great relationship. Early users only AT & T one can choose. Many users of iPhone 3GS or even earlier to perform the contract has not finished. But a new generation of iPhone full of these people still have the temptation, so many people to retain the original tariff in the case, the purchase of a new generation of iPhone bare metal, continue to use their own SIM card.

But as more people contract expires, if your policy is not very attractive offer, it is likely to result in the loss of the user. We also see that the sales in the iPhone 4S, AT & T also take the lead in a series of initiatives. Improve service quality, lower tariff prices, increased package contents, these improvements only one purpose, that is hoping to retain existing users and attract more new users. very likable, the biggest feature is the shape of small, icon above we can see. according to
